

SSEM 5.0 - Enhancements/Bug Fixes

Story	Item Description	Enhance
227	Mass Printing Progress Reports. Allows users with classes to print all progress reports for students in the class at one time. Note: user will want to finalize previous year progress reports before taking advantage of this feature.	A20
228	Finalized Forms Report. Shows users the students with finalized IEPs in the specified date range, both those included/excluded from the EMIS Tools piece (see enhancement E21 below).	A29
230	Add to Banks from Forms. Allows the user to add information to the banks from the Import from Bank screen on forms. User can copy/paste text from form to the bank area for that field without leaving the Import from Bank screen.	B4
232	Create from Existing Restrictions. Shows user only the same form options when using the Create from Existing feature on forms creation instead of every form within that form type.	C12
131	EMIS Review Report Selection. Changes blue pin on the EMIS Report to arrow icon to better match other selection icons within the application.	D3
233	Unfinalized Forms Report. Shows users the students with unfinalized IEP cover pages so it is apparent which IEPs need to be finalized.	D11
131	EMIS Extract Error Message. Changes wording on the EMIS Extract generator from "errors occurred" to "data errors occurred" to better reflect results.	D24
138	EMIS Transaction Log Sorting. Allows user to sort data in the EMIS Transaction Log by clicking column headers and sorting accordingly. Also allows users to purge previous transactions based on user specified date range.	D29
234	View Forms Icons. For Admins with Delete Finalized access, moves Delete Form Set icon further away from View Form icon so wrong icon isn't clicked.	E3
133	Pull if Present changes to finalization. Modifies the pull if present list on IEP finalization to no longer pull over some of the evaluation forms if they've been completed. Now, only IEP forms and Invitations pull over.	E17
134	Finalized Form Flag. Allows user to mark a finalized IEP/EMIS Set to not be included in the EMIS Report and EMIS Extract.	E21
132	Default Testing Dates on EMIS Form. Pre-populates the EMIS Form with the most common date of each test so field only needs corrected when different, not filled out for all tests.	F6
268	Removal of Form Wizard links. Removal of Form Wizard functionality in SSEM to allow for quicker forms development and better character limits on forms.	
257	Removal of ActivePDF from application interface. Updates application to no longer user ActivePDF with the forms generation or any of the User Options.	---

Story	Item Description	ITC - Ticket
237	Drop-Down Lists. Corrected lists to display options in a single-spaced format.	---
374	Extra Testing Data on Preview DCF. Corrected issue where testing data from previously finalized IEPs was displaying on the Preview EMIS Data Collection Form for some districts.	LACA 647009 SCOCA 647695 OMERESA 649325 OMERESA 654769
376	EMIS Extract Blank. Corrected issue where EMIS Extract took longer than three minutes to run and process was stopped, generating a blank report. Now, the extract will continue to run until completed, generating extract and error log. Extract also enhanced to run quicker.	SWOCA 631290 HCCA 619444
275	Two Testing Pages on Preview DCF. Corrected issue where only first created testing page data displays on the EMIS DCF. Now, both the first and second testing pages display.	LACA 608205 OMERESA 625170
350	Gender Box on Finalized Set. Corrected issue where female gender box does not display as checked in Print Merge and Finalize screens.	SWOCA 659138 SCOCA 653700 NEONET 677809
245	Form Grade Levels Changing. Corrected issue where changing the grade level on the testing page changed the grade level on cover page.	MVECA 601632 NEONET 638697
399	SSL Friendly Default. Corrected application set up so spell check SSL friendly setting is defaulted to On as majority of ITCs use SSL for SSEM application.	---
