

Current Bug List

As of: April 22, 2009

- **Test Date Year Calculation on EMIS Extract (5.1.2)**
- **Placeholder for Blank Services on EMIS DCF (5.1.2)**
- **Due Date Calculation on IEP Due Date Report (6.0)**
 - IEP Due Date Report is not calculating the Due Date properly. Currently returning just the Meeting Date from the finalized IEP should be returning the IEP Meeting Date PLUS one year on the IEP Due Date report.
- **Disability Condition print from PR06P2 (6.0)**
 - Disability Condition selected on the PR06P2 and saved once on the form, displays the code on the Print Merge screen. If the form is saved twice, or more, the Print Merge will display description as selected on the form. Not seeing this problem with the PR07P1 or PR07P2.
- **Disability Start Date EMIS Extract Error (6.0)**
 - Extract Error missing Disability Start Date should only appear if the Disability Code changed from what is in the system. It should not appear if the Disability Code is the same as the previous year. Cannot resolve until DASL and PB again integrate the Disability Code.
- **Copy/Paste showing new Funky Characters**
 - The copy/paste functionality from Word is again replacing the apostrophes and double quotes with funky characters. This time, the characters are more symbols than letters, but it is still presenting the problem.
