

Special Services Known Bugs List

Id	Project	Name	Description	Found In	Plan Fixed in
1632	EMIS Tools	SpS - Extract Error - Update Disability Start Date	Extract Error missing Disability Start Date should only appear if the Disability Code changed from what is in the system. It should not appear if the Disability Code is the same as the previous year. Cannot resolve until DASL and PB again integrate the Disability Code.	5.1.0	
1729	EMIS Tools	SpS - Report DCF - Extra Test record on DCF, not in DB	Additional data showing on Report DCF (second test name populates for some tests) though it is not in the spsStudentFinalizedSelectedLov table which populates the Report DCF. Deleting first row of data for corresponding test does not delete the duplicate data row. Cannot identify where duplicate row is pulling from. Additional cases include EMIS testing page displaying the wrong grade and pulling invalid testing information.	5.1.2	SSEM 5.1.3
1731	EMIS Tools	SpS - EMIS Report - Transition Plan Values Missing on Report, in DB.	Transition Plan Codes are not populating on the EMIS Review Report, though they appear on the Report DCF and the EMIS Extract. If the Report DCF is opened and saved, then the Transition Plan Codes (211100 and 211105) populate properly on the EMIS Review Report. Confirmed issue present across versions/sites.	5.1.1, 5.1.2	SSEM 5.1.3
1735	Forms	SpS - Progress Reports - Data Not Populating from Goals	...	5.1.1	
1730	Forms	SpS - PR07P1 - Grade Level Won't Save Changes after First Save	<P>Grade Levels on the PR07P1 are not saving changes after the initial save of the form. When form is first opened, grade levels can be changed and will save upon clicking save. However, no additional changes to the grade levels will save on subsequent attempts to save, though all other field changes do save.</P>	5.1.1, 5.1.2	SSEM 5.1.3
1620	Forms	SpS - ALL Forms - Copy/Paste Funky Characters	The copy/paste functionality from Word is again replacing the apostrophes and double quotes with funky characters. This time, the characters are more symbols than letters, but it is still presenting the problem.	5.1.0	
1728	Forms	SpS - PR07P6 - Testing Page Grade Level	Grade selection made on form naming screen for the PR07P6 Testing page is not reflecting on the form when it is created. Grade level defaults to the student's current grade level, which therefore populates the form with the previous school year's tests. 	5.1.2	SSEM 5.1.3
1631	Open Tasks	SpS - Print Merge - Printing Codes after First Save	Disability Condition selected on the PR06P2 and saved once on the form, displays the code on the Print Merge screen. If the form is saved twice, or more, the Print Merge will display description as selected on the form. Not seeing this problem with the PR07P1 or PR07P2.	5.1.0	
1643	Reports	SpS - IEP Due Date Report - Calculate Due Date	IEP Due Date Report is not calculating the Due Date properly. Currently returning just the Meeting Date from the finalized IEP, should be returning the IEP Meeting Date PLUS one year on the IEP Due Date report.	5.1.0
