

Special Services Known Bugs List

As of: 1/9/2009

1. **IIEP and RIEP Start/End Dates.** The IEP effective dates are currently pulling into both the IIEP and the RIEP Start/End Date fields on the Data Collection Form. Only the row with the event date selected will be pulled onto the EMIS Extract. ***(SA working on issue).***
2. **Print Merge - Printing Codes after First Save.** Disability Condition selected on the PR06P2 and saved once on the form, displays the code on the Print Merge Screen. If the form is saved twice, or more, the Print Merge will display description as selected on the form. Not seeing this problem with the PR07P1 or PR07P2. ***(SA working on issue).***
3. **All Forms - Copy/Paste Showing Funky Characters.** The copy/paste functionality from Word is again replacing the apostrophes and double quotes with funky characters. This time, the characters are more symbols than letters, but it is still presenting the problem. ***(SA working on issue).***
4. **IEP Due Date Report - Calculate Due Date.** IEP Due Date Report is not calculating the Due Date properly. Currently returning just the Meeting Date from the finalized IEP, should be returning the IEP Meeting Date PLUS one year on the IEP Due Date Report. ***(SA working on issue).***
5. **Extract Error - Update Disability Start Date.** Extract Error missing Disability Start Date should only appear if the Disability Code changed from what is in the system. It should not appear if the Disability Code is the same as the previous year. ***(Cannot resolve until DASL and PB again integrate the Disability Code.)***
